Experience

New Lantern — San Francisco, CA

Head of Imaging — *Nov 2026 – Present*

- Lead imaging at New Lantern: the diagnostic viewer, image delivery and imaging AI, and the engineers who build them.

Principal Software Engineer — *Nov 2025 – Nov 2026*

- Led the 3-engineer Viewer team and the imaging roadmap; authored 575 merged PRs and reviewed 456 more.
- Launched HyperSync: cross-study image registration that aligns priors to anatomy, cutting registration from 3 min to 16 s.
- Cut viewport interaction latency from 3,000 ms to 30 ms on 23,000-image studies; platform p90 study load fell 46%.
- Built viewer observability (Datadog RUM, profiling) for 16M+ frames (7.7 TB) a week and several million studies a month.
- Rebuilt admin as one in-product portal for users, studies, sites, billing, audit logs, onboarding and report delivery.
- Built the phone app: worklist, chat, the viewer with touch controls, dictation, sign-off and on-call alerts.
- Launched New Lantern on the Elgato Stream Deck Marketplace: 120+ actions, 6 device profiles and live status dials.
- Led incident response and escalations across 9 customer groups, including commanding several SEV0 and SEV1 incidents.
- Expanded mammography CAD and 2D-to-tomo navigation; co-created the New Lantern Residency (239 applications).

Software Engineer — *Oct 2024 – Nov 2025*

- Led the viewer roadmap and shipped a production mammography suite with BI-RADS reporting and radiologist workflows.
- Designed PET/CT and PET/MR fusion with SUV quantification, tumor segmentation and MIP 3D visualization.
- Built customizable hanging protocols for every modality and synchronized support for up to four monitors.
- Cut first-pixel load from 1.8 s to under 100 ms and integrated SAM 2, TotalSegmentator and LLM report generation.

Radical Imaging — Boston, MA

Lead Software Engineer — *June 2023 – March 2025*

- Led the team behind FlexView, a SaaS DICOM viewer built with NestJS and Next.js.
- Core maintainer of Cornerstone3D and OHIF, the open-source standards for web medical imaging.
- Integrated AWS Marketplace into our SaaS offerings, driving a surge in customer acquisition.
- Engineered integrations with EPIC EHR, NVIDIA MONAI and major cloud services; established FDA validation methods.
- Hardened AWS infrastructure security and built automated testing with Jest, Cypress and Playwright.

Jewish General Hospital — Montreal, QC

Software Engineer — *April 2022 – June 2023*

- Deployed ML models on AWS EC2 and SageMaker, serving inference with FastAPI, Nginx and a load balancer.
- Built authentication with AWS Cognito and FastAPI JWT verification; led app and infrastructure design.
- Developed a fast web DICOM viewer in Vue 3 with CornerstoneJS for accelerated display and decoding.

Grafana Labs — New York, NY

Software Engineer — *Jan 2022 – April 2022*

- Built an admin UI for feature toggles, surfacing active toggles in each Grafana instance and reducing support load.
- Wrote design docs covering feature architecture, UX and implementation strategy.

Technical Skills

Languages/Frameworks: TypeScript, Python, React, Next.js, Node.js, NestJS, Django, FastAPI, SQL, PyTorch, ONNX
Imaging/Cloud/Tools: DICOM, DICOMweb, Cornerstone3D, OHIF, WebGL, ITK/ANTs, AWS, GCP, Cloudflare, Modal, Docker, Terraform, Datadog, Playwright

Education

Memorial University of Newfoundland — St. John's, NL

Bachelor of Science in Computer Science — *Sep. 2020 – Apr. 2024*

Certificates & Awards

IDesign - Architect's Master Class — July 2024 – Present

AWS Certified Solutions Architect Professional — Jan 2023 – Present
